

Degen Animls - White Paper V2 (2025)

The living AI-powered NFT ecosystem of Base

Introduction

Degen Animls is an evolving NFT ecosystem powered by the tokenized AI model DANIMLS-V1 on Alpaca Network AI. Each NFT is generated in real time by the community, which keeps the collection dynamic and deflationary. DANIMLS-V1 unites token holders, NFT owners, and developers in a shared reward system that grows stronger with every mint.

Ecosystem Overview

The ecosystem includes four live components that work in sync. 1) DANIMLS-V1 Token: the backbone of the AI model and currency for minting. 2) Degen Animls NFT Collection: NFTs created on demand via the Telegram Bot or website. 3) Hidden Shadows Expansion: a mathematically bullish set with a 50% burn and 50% reward model. 4) Alpaca Network Integration: infrastructure for scale and interoperability.

NFT Generation and Minting

Standard Generations provide two random images. Premium Generations, unlocked by holding at least 5,000,000 \$DANIMLS-V1, allow full customization. NFTs can be minted with ETH or \$DANIMLS-V1. Mint proceeds split 60% to Development and Operations and 40% to the NFT Reward Pool.

Rewards and Distribution

Degen Animl holders earn from the 40% reward pool on a weekly or bi-weekly schedule with tiered payouts. Hidden Shadows holders follow a 50% burn and 50% holder distribution model. All token holders benefit from deflation and rising utility as the ecosystem grows.

Tokenomics Recap

Total supply is 1,000,000,000 DANIMLS-V1. Distribution: 87.5% to a bonding curve, 12.5% to liquidity pools, 3.14% to the DAO and Treasury, 3.14% to Stakers, and 25%

locked until 2028. In short, every mint benefits holders, increases scarcity, and fuels development.

Hidden Shadows Expansion

Hidden Shadows launches 11.11.2025 on Base. Each mint burns 50% of tokens and distributes 50% to holders. Commons (100,000) equal 2 Degens, Rares (250,000) equal 5, and Ascended (500,000) equal 10 in the reward pool. The full Hidden Codex story is revealed when all tokens are minted.

Future Utility: Neon Check-In Wars

A gamified evolution of Alley Wars. NFTs act as avatars in faction strategy across neon Tokyo. Energy, loot, and daily check-ins create token rewards. \$DANIMLS-V1 powers upgrades and staked advantages.

Community and Governance

Holders steer the roadmap through proposals and votes. Partner projects can integrate the DANIMLS engine to mint branded NFTs through API or bot. Governance manages DAO budgeting, reward weighting, and collaborations.

Vision

Degen Animls merges AI, art, and blockchain into a self-evolving system. It enables dynamic ownership, deflationary rewards, and community creativity. The mission is to make Degen Animls the NFT engine of Base.

Closing Note

This document summarizes the current design. As new features are shipped, the whitepaper will be updated to reflect production reality. Herd Goes Hard.
